### DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:
2. The abstract of the disclosure is objected to because the instant abstract has more than 150 words. Applicant is required to submit a new abstract on a separate sheet of paper. Correction is required. See MPEP § 608.01(b).
3. The disclosure (page 2, line 25, to page 3, line 1) is objected to because it contains an embedded hyperlink and/or other form of browser-executable code. Applicant is required to delete the embedded hyperlink and/or other form of browser-executable code. See MPEP § 608.01.
4. The specification is objected to because the words are crowded too closely together, making reading difficult. For example, line 1 on page 2 (below) appears as one long word without any spacing in between the words.

**a storage attached to a network is referred to as network storage.**

It is noted that the word spacing issue appears throughout the instant specification. Correction is required.

### CONCLUSION

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
  - a. Yasuda et al., which has a publication date that is post the foreign priority date of the instant application, is a reference that is pertinent to the instant claimed invention.

Art Unit: 2168

6. Prosecution on the merits is closed in accordance with the practice under *Ex parte*

*Quayle*, 1935 C.D. 11, 453 O.G. 213.

7. A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
